

High-Tech Chelated Mineral Calcium Supplement

Livestock, Poultry and Aquaculture Feed Supplement

Calcium

Calcium is an essential element for livestock, poultry and aquatic species. This element plays a central role in blood coagulation, heart physiological activity, cell signaling, bone, tooth and egg structure, reproduction and proper functioning of gastrointestinal tract. Deficiency in calcium has a negative impact on growth, bone formation, neuromuscular activities and other calcium-related physiological processes.

High-Tech Iron Supplement

High-tech chelated mineral calcium supplement is a unique product containing chelated calcium for livestock, poultry, aquatic species and companion animals. This supplement is synthesized and produced based on Chelate Compounds technology.

This technology is patented in the United States Patent and Trademark Office (USPTO). The manufactured supplements based on this technology, due to their unique structure, enjoy better absorption rate than other available chelated and mineral supplements.

- ◆ Adding this supplement to diet boosts the performance and welfare of herds to a great extent.
- ◆ One kg of this supplement contains 200,000mg (20%) chelated calcium.
- ◆ This supplement is in powder form, soluble in water and mixable with feed/concentrate. It is packaged in 20-kg bags.

Direction for Use

Consumption Dose for Livestock, Poultry, Aquatic Species and Companion Animals:

- 500g of this supplement should be mixed with every metric ton of feed to supply 100ppm calcium in diets.

Notes

- ✓ This product must be kept out of reach of children, away from direct sunlight, in a dry place, at room temperature and in the original bag.
- ✓ The expiration date is 2 years after production if the bag remains closed, and 12 months after it is opened.
