

High-Tech Chelated Mineral Zinc Supplement

Livestock, Poultry and Aquaculture Feed Supplement

Zinc

Zinc is an essential micronutrient for livestock, poultry and aquatic species. This element plays a key role in muscles and bones growth and development, fur growth, fertility and immune system function. Zinc deficiency causes serious problems in growth and metabolism and reduces performance.

High-Tech Zinc Supplement

High-tech chelated mineral zinc supplement is a unique product containing chelated zinc for livestock, poultry, aquatic species and companion animals. This supplement is synthesized and produced based on Chelate Compounds technology.

This technology is patented in the United States Patent and Trademark Office (USPTO). The manufactured supplements based on this technology, due to their unique structure, enjoy better absorption rate than other available chelated and mineral supplements.

- ◆ Adding this supplement to diet maximizes the performance & production quality of herds and minimizes the incidence of diseases & mortalities.
- ◆ One kg of this supplement contains 160,000mg (16%) chelated zinc.
- ◆ This supplement is in powder form, soluble in water and mixable with feed/concentrate. It is packaged in 20-kg bags.

Direction for Use

Consumption Dose for Livestock, Poultry, Aquatic Species and Companion Animals:

- 250g of this supplement should be mixed with every metric ton of feed to supply 40ppm zinc in diets.
- 375g of this supplement should be mixed with every metric ton of feed to supply 60ppm zinc in diets.

Notes

- ✓ This product must be kept out of reach of children, away from direct sunlight, in a dry place, at room temperature and in the original bag.
- ✓ The expiration date is 2 years after production if the bag remains closed, and 12 months after it is opened.
