

High-Tech Chelated Mineral Copper Supplement

Livestock, Poultry and Aquaculture Feed Supplement

Copper

Copper is an essential micronutrient for livestock, poultry and aquatic species. This element is effective in enzyme activities, bone strength and wool, fur and blood cells formation. Copper deficiency causes metabolic process disorders associated with growth and immunity, which finally reduces the performance and overall welfare of the herds.

High-Tech Copper Supplement

High-tech chelated mineral copper supplement is a unique product containing chelated copper for livestock, poultry, aquatic species and companion animals. This supplement is synthesized and produced based on Chelate Compounds technology.

This technology is patented in the United States Patent and Trademark Office (USPTO). The manufactured supplements based on this technology, due to their unique structure, enjoy better absorption rate than other available chelated and mineral supplements.

- ◆ Adding this supplement to diet maximizes performance and minimizes the incidence of diseases on farms.
- ◆ One kg of this supplement contains 120,000mg (12%) chelated copper.
- ◆ This supplement is in powder form, soluble in water and mixable with feed/concentrate. It is packaged in 20-kg bags.

Direction for Use

Consumption Dose for Livestock, Poultry, Aquatic Species and Companion Animals:

- 42g of this supplement should be mixed with every metric ton of feed to supply 5ppm copper in diets.
- 84g of this supplement should be mixed with every metric ton of feed to supply 10ppm copper in diets.

Notes

- ✓ This product must be kept out of reach of children, away from direct sunlight, in a dry place, at room temperature and in the original bag.
- ✓ The expiration date is 2 years after production if the bag remains closed, and 12 months after it is opened.
